WATER PURIFIERS

THE FROG: POOL WATER PURIFIER

Fresh Reservoir Oxy Generator from New Water. The FROG hardware is three parts in one. First, the FROG cyclor serves as a “water treatment center” and controls the flow of water. Secondly, there is a cyclor inside the FROG reservoir that’s removable and holds the minerals. Thirdly, inside the FROG reservoir is a CHLORINE PAC. It is nested together in one complete unit. NO extra plumbing. NO extra headaches. And NO electricity since nature doesn’t use electricity to purify water, why should we? The FROG makes the water feel softer and sparkling clean. It fights bacteria and eliminates algae prevention. The minerals help to keep your water pH balanced by acting as a neutralizer.

SUNHEATER SOLAR HEATING SYSTEMS

ABOVE GROUND & IN GROUND POOLS

A SunHeater™ solar pool heating system will raise the temperature of your pool water by up to 10° F (6° C) or more. It is lightweight, durable and easy to install. Water simply flows through the SunHeater's™ many tubes via your existing pool pump where it is heated by the sun and returned to your pool (see accompanying illustration). The system can be installed on the roof of your house, shed or cabana, mounted to a rack (optional mounting kit SK43 available), or simply placed on the ground. Get the system used by hundreds of thousands of Americans – the SunHeater™ solar pool heating system – and save money on fuel and electricity bills, extend your swimming season by weeks, and get more enjoyment from your pool than ever before.
